Dear Investor,

On behalf of the Board of Directors of both Voyager Global Group Limited (**Voyager** or the **Company**) and "Cycliq Group Ltd" (the renamed Company), I am pleased to present you with this Prospectus and invite you to become a Shareholder in the Company. Voyager is transitioning from an oil and gas exploration company to a technology company through its acquisition of 100% of Federation Enterprises (WA) Pty Ltd (ACN 119 804 974) (**Cycliq**).

Voyager is an Australian Securities Exchange (**ASX**) listed company. It has entered into the HOA pursuant to which it has conditionally agreed to acquire 100% of the issued shares in Cycliq (**Cycliq Shares**) from the holders of the Cycliq Shares (**Cycliq Shareholders**).

The Cycliq transaction will result in a material change in the nature and scale of the Company's activities, therefore the primary purpose of this Prospectus is to re-comply with Chapters 1 and 2 of the ASX Listing Rules and to provide the Company with the required funding to implement the commercialisation strategy of the Cycliq technology. This Prospectus contains information about the Company, Cycliq, the Offers and the proposed Acquisition. It also contains detailed information in Section 5D of the Investment Overview section and Section 8 of this Prospectus about the potential risks of investing in the Company. I encourage you to read this Prospectus carefully and completely, and consult with your professional advisers if required.

On behalf of the Board of the Company, I am pleased to present this Prospectus to you and invite you to take part in this exciting investment opportunity. I look forward to welcoming you as a shareholder of the Company, proposed to be renamed "Cycliq Group Ltd".

Yours sincerely,

Piers Lewis

B. Business Model

How will the Company generate income?	<p>Cycliq currently generates revenue from the sale of its HD camera and light combos, apparel and accessories. What are the key business strategies of the Company?	<p>Growth opportunities for revenue currently come from key geographies (US, UK and Australia) where Cycliq has an initial presence. Revenues into new territories such as the EU and select regions of Asia are growing but do not account for a significant portion of Cycliq’s current overall revenue. Cycliq intends to expand its footprint into key territories by opening new sales channels both online as well as brick and mortar store fronts via its distribution network.</p> <p>Cycliq hopes to continue to drive sales through marketing initiatives including campaigns, user generated content, influencer marketing with individuals and teams as well as key industry events both in Australia and overseas.</p> <p>In addition to sales of its products, Cycliq is looking at other revenue streams such as cloud based subscription services, premium smartphone applications (‘apps’) for</p>	Section 7.3

Accordingly, Cycliq has a product roadmap of proposed new products, supporting accessories and software applications to ensure a strong supply of innovative solutions for customers which will not only function for the cycling market but other vertical markets within the broader action camera segment.</p>	
--	--	--

<p>What are the key dependencies of the Company's business model?</p>	<p>The key factors that Cycliq will depend on to meet its objectives are the:</p> <ul style="list-style-type: none"> (a) successful completion of the Offers; (b) successful Settlement of the Acquisition; (c) continuing ability of the Company to attract customers to the Cycliq technology; (d) continuing ability to provide superior functionality and service through its products and services to its customers; (e) the continued limited competition in the industry in which Cycliq operates; and (f) increasing product sales. 	<p>Section 7.6</p>
---	---	--------------------

C. Key Investment Highlights

<p>What are the key investment highlights?</p>	<p>The Existing Directors and Incoming Directors are of the view that key highlights of an investment in the Company include:</p> <ul style="list-style-type: none"> (a) the Company will obtain ownership of Cycliq through the Acquisition; (b) the Acquisition represents an attractive investment opportunity for the Company to change its business focus to that of a cycling products and technology company; (c) with the increasing popularity of cycling and an appetite of both the cycling and non-cycling public to make cycling a safer, more accessible and enjoyable pastime, the Company will be exposed to an industry which has the potential to grow significantly; (d) Cycliq is currently generating revenue through the sale of its products in over 25 countries; (e) the Public Offer will inject significant funds into the Company in the context of its current funding profile. This will enable it to undertake preliminary actions in pursuance of its new direction and growth activities; and 	<p>Section 7.2</p>
--	---	--------------------

	(g) the Company will be managed by directors and officers with significant experience in cycling and in the cycling technology industry.	
D. Key Risks		
<p>What are the key risks of an investment in the Company?</p>	<p>The business, assets and operations of the Company, including after Settlement, are subject to certain risk factors that have the potential to influence the operating and financial performance of the Company in the future. These risks can impact on the value of an investment in the Securities of the Company.</p> <p>The Incoming Directors aim to manage these risks by carefully planning the Company's activities and implementing risk control measures. Some of the risks are, however, highly unpredictable and the extent to which the Board can effectively manage them is limited.</p> <p>Based on the information available, the key risk factors affecting the Company include:</p> <p>(a) Competition and new technologies: The industry in which Cycliq is involved is subject to increasing domestic and global competition which is fast-paced and fast-changing. While the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, whose activities or actions may positively or negatively affect the operating and financial performance of the Company's projects and business. The size and financial strength of some of Cycliq's competitors may make it difficult for it to maintain a competitive position in the technology market.</p> <p>(b) Sales and marketing success: Following Settlement, the Company intends to focus on developing and marketing the Cycliq Technology. By its nature, there is no guarantee that the Cycliq Technology's development and marketing campaign will be successful. In the event that it is not, the Company may encounter difficulty creating market awareness of the Cycliq Technology. This would likely have an adverse impact on the Company's potential profitability.</p> <p>(c) Historical financial performance is not indicative on future growth: Cycliq's historical financial performance does not provide an indication on growth in the future. If future revenues are lower than expected and costs are higher than expected, financial results could show a lower amount of profit or greater losses. Cycliq is a growing and early stage company which historically has spent more</p>	<p>Section 8</p>

money than it has made, delivering losses. These losses can continue for a number of years while establishing the brand and product positioning which requires substantial cash. The amount of cash required to establish the brand or to generate enough revenue to bring Cycliq into a profitable financial position could require more cash than it has available. To continue to grow the brand, Cycliq could require additional funding which could include raising more money on the ASX, borrowing money from financial institutions or investors.

(d) **Risks associated with overseas expansion:** The Cycliq Technology has been constructed so as to be capable of being utilised in, and marketed to, multiple overseas jurisdictions. Cycliq generates much of its income from its international distribution network. As Cycliq seeks to expand into further overseas markets, including Southeast Asia, Europe and Latin America, it may require a physical presence in those countries and an associated increase in overheads, development costs and marketing costs. There is the risk that any overseas expansion will be unsuccessful, or that even if there is demand for Cycliq's products in that market, that the costs of doing business in that market are such that Cycliq's profitability and available working capital will be adversely impacted.

(e) **Protection of intellectual property rights:** Cycliq has pursued IP protection in the form of trade marks, trade mark applications, patents and patent applications. The patents and trade marks are only enforceable in the territories in which they are registered. Cycliq may have to consider applying for registration of its patents and trade marks in further territories as its operations expand in order to protect its intellectual property rights in those areas but there is no guarantee that any such applications would be successful.

Legal standards relating to the validity, enforceability and scope of protection of intellectual property rights are uncertain. Effective patent, trademark, copyright and trade secret protection may not be available to the Company in every country in which the Cycliq Technology may eventually be launched. Accordingly, despite its efforts, the Company may not be able to prevent third parties from infringing upon or misappropriating its intellectual property.

(f) **Manufacturer and supplier risk:** Cycliq does not have internal manufacturing capabilities and

	<p>relies on contractors to manufacture the products. Cycliq current relies on a single head-contractor in Hong Kong, which manages the manufacture through various sub-contractors in mainland China. Any termination or significant damage to the arrangements with Cycliq’s manufacturing head contractor could affect Cycliq’s ability to manufacture its products and meet customer demand until a replacement contractor can be engaged.</p> <p>(g) Inventory risk: To ensure there is an appropriate amount of inventory for each of the product lines, Cycliq forecast the anticipated demand for each product in advance of demand. This means placing orders with suppliers well in advance of requiring the products. If inventory management is not managed correctly, it could lead to lower levels of revenue.</p> <p>(h) Product development: The growth of Cycliq largely depends on the ability to anticipate consumer demand and deliver solutions in a timely manner. The cost and effort involved in product development is substantial and may continue to be a growing cost centre for the Company. Developing new and innovative products involves many unknown factors such as requiring materials not yet available to design and engineering challenges that could require substantial additional resources. There may not be commercially appropriate uses for these products.</p> <p>For additional specific risks associated with the contemplated Acquisition please refer to Sections 8.2 and 8.3. For other general investment risks, many of which are largely beyond the control of the Company and its Directors, please refer to Section 8.4.</p>

- (i) Andrew Hagen;
- (ii) Kingsley Fiegert;

(d) **Industry Overview and Market Position**

Cycling is a growing sport often referred to as 'the new golf'¹ and Cycliq believes it is the number one brand in HD camera and light combos.

Currently there are no competing products that incorporate both a HD video camera and light as a stand-alone accessory utilising nanotechnology.

Cycliq's products are intended to be positioned in the market as the leader in battery life and innovative accompanying software, which the Incoming Directors believe differentiates Cycliq from other action camera competitors. Although other action camera companies could seek to expand their battery capacity (as Cycliq anticipates they will), Cycliq's Fly12 battery life is currently up to 5 times that of the leading action camera in the market.

A significant barrier to entry is the current form and design factor of competitors' action cameras, which are so small that it prevents them from including sufficient battery power to compete with Cycliq. In addition, Cycliq has spent considerable research and development

¹ <http://www.businessinsider.com.au/cycling-is-the-new-golf-2015-2?r=US&IR=T>

resources developing products that have a camera and emit light without causing camera flare or light pollution onto the footage.

The professional cycling industry is looking for new ways to monetise the sport of cycling and on-board video footage during races has been identified as the leading opportunity to achieve this goal.² Cycliq's products are well suited to this opportunity, delivering both HD footage that can record entire rides as well as lighting needed to keep cyclists safe on the roads.

Cycliq's focus on developing and maximising user generated content for its products will allow it grow the Cycliq brand in a genuine and organic manner, whilst the content also provides a constant feed of authentic marketing material.

(e) **Company Overview**

Cycliq is continuing to implement an expansion strategy for the business including:

- (i) developing innovative and relevant products (current & on-going);
- (ii) growing and adding key relationships such as Strava (current & on-going);
- (iii) investigating other revenue streams, including a cloud based subscription service to enhance the use of Cycliq's products for customers (short term);
- (iv) proposing a pro-level mobile editing suite offering its customers expanded editing and sharing capabilities (medium term);
- (v) increasing the amount of its intellectual property with a view to licence the technology to others (medium to long term);
- (vi) harvesting user data and customer profiling (big data) as a potential future revenue stream (medium to long term); and
- (vii) addressing the needs of other market verticals with our product offerings (as the opportunities arise).

(f) **Manufacturing**

Cycliq utilises Australian industrial design along with a Hong Kong electronics design house that collaborates with in-house project managers to develop innovative products that meet our exacting design standards. These products are manufactured in mainland China under supervision from Cycliq's hardware manager and the Hong Kong electronics design house. Using rapid prototyping methodologies, Cycliq's hardware and software is closely managed from its Perth headquarters and regular time spent in China ensuring the hardware and software meets Cycliq's exacting standards.

- (ii) the inclusion of an integrated light either to be seen on the road or to see where you are going at night;
- (iii) being the only company to harvest Strava metrics and overlay them onto the footage from a smartphone;

- (i) using 'user stories' as the basis for product development and design;
- (ii) continuing to develop and protect its own intellectual property;
- (iii) the procurement of unique third party IP and materials for inclusion in future products;
- (iv) the enhancement of its technical capabilities to further build on its high standards of quality and design in both hardware and software;

This platform is a video based training module also used by some of the biggest consumer electronic brands⁴<https://www.experticity.com/business/clients/>. To support distribution sales in both the UK & US in the short term, Cycliq will also be looking to build a sales force

In-store sales support

Sales will also be supported in store by a point of presence (POP) in-store display showcasing Cycliq's flagship products. These POPs are a physical unit that can be mounted in-store on a counter top or slat wall with a video display screen which loops marketing videos promoting the products. Cycliq's POPs also enable customers to interact with the display providing further engagement. Cycliq has placed an order for POP's for a global staged roll out to stores over the next six months.

(j) **Strategy Post Listing**

³ <http://www.pinkbike.com/news/uci-amend-rules-on-the-use-of-onboard-cameras-2015.html>

⁴<https://www.experticity.com/business/clients/>

Growth opportunities for revenue currently come from key geographies (US, UK and Australia) where Cycliq have an initial presence. Revenues into new territories such as the EU and select regions of Asia are growing but do not account for a significant portion of Cycliq's current overall revenue. Cycliq intends to expand its footprint into key territories by opening new sales channels in online and brick and mortar store fronts via its distribution network.

Cycliq hopes to continue to drive sales through marketing initiatives including campaigns, user generated content, influencer marketing with individuals and teams as well as key industry events both in Australia and overseas. These initiatives are the main drivers of growth in Cycliq's brand equity and product awareness and Cycliq hopes to drive sales through both the online platforms and brick and mortar channels of Cycliq's global network of bike dealers and distributors.

In addition to sales of its products, Cycliq is looking at other revenue streams such as cloud based subscription services, premium smartphone applications ('apps') for sale on iTunes and Google Play stores and the licensing of its intellectual property to third parties.

Product innovation and investment in research and development will be a key competitive advantage for Cycliq. Accordingly, Cycliq has a product roadmap of proposed new products, supporting accessories and software applications to ensure a strong supply of innovative solutions for our customers which will not only function for the cycling market but other vertical markets within the broader action camera segment.

(k) **Intellectual Property**

Cycliq has been developing its technology and products for over four years and currently has patents/ patent applications and trademarks/ trademark applications which, as at the date of this Prospectus, includes the patents/ patent applications and trademarks/ trademark applications set out in Annexure 1.

The initial patents Cycliq applied for were focused on physical or hardware applications whereas most recent patent applications also relate to software enabling technology applied to HD camera and light products for cyclists. Cycliq sees the progression of software enabled product patents a key aspect to developing intellectual property based assets and achieving increased revenue and capital growth of its business.

7.4 Direction of the Company

Upon Settlement of the Acquisition, the Company's focus will shift from oil and gas exploration and production to the technology industry, specifically the development and commercialisation of the Cycliq Technology.

Section 14.1(a) describes the proposed consideration payable by the Company at Settlement, being the Consideration Shares and the Performance Shares, which was agreed following negotiations between the Company and representatives of Cycliq.

The Board considers that the quantum of the Consideration Shares and Performance Shares to be issued for the Acquisition reflects reasonable fair value

of Cycliq in view of the key investment highlights set out in Section 7.2 of the Prospectus. In determining the purchase price for Cycliq, the Directors of the Company took into account the following considerations:

- (a) internal revenue and profit forecasts of Cycliq. However, those forecasts cannot be stated publically as they do not comply with ASIC guidelines (in particular, ASIC Regulatory Guide 170 which requires directors to have a reasonable basis for disclosing forecast financial information);
- (b) the last prices at which Cycliq raised equity funding from third party investors;
- (c) Cycliq's future prospects based on the status of the Cycliq Technology and interest from third parties; and
- (d) representations from the Cycliq directors as to the price at which a takeover offer for Cycliq would be likely to succeed.

The Company confirms that no formal valuation process in respect of Cycliq was undertaken through the engagement of independent advisers.

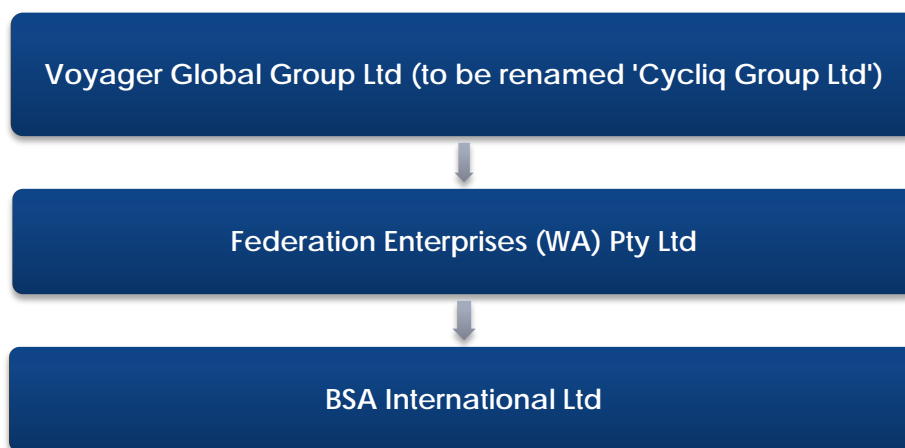

The final price was determined through arm's length negotiations that took place over a number of weeks between the directors of Cycliq and the Directors of the Company. As with the acquisition of any business or asset that does not have a meaningful track record of revenue and profitability, there is not always a good valuation methodology available when determining the purchase price and the Directors were required to take into account qualitative factors such as those set out above in coming to a decision on price and it was based on these reasons that the consideration payable would consist entirely of scrip which would be subject to escrow provisions (no cash component) so that the value would ultimately be dependent upon the success of the Cycliq business itself following completion of the Acquisition.

The Board is of the opinion that the opportunity presented under the Acquisition represents an opportunity that is in the best interest of current Shareholders of the Company and was involved in a lengthy negotiation process prior to executing the HOA.

The opportunity structured and presented under the Acquisition presents Shareholders with the opportunity to hold a position in a unique business with the ability to generate revenue in an existing market with an opportunity for significant growth.

7.5 Group Structure

If the Acquisition reaches Settlement, Cycliq will become a wholly owned subsidiary of the Company.

7.6 Key Dependencies of the Business Model

The key factors that Cycliq will depend on to meet its objectives are:

- (a) the successful completion of the Offers;
- (b) the successful Settlement of the Acquisition;
- (c) the continuing ability of the Company to attract customers to the Cycliq Technology;
- (d) the continuing ability to provide superior functionality and service to its customers;
- (e) increasing product sales; and
- (f) the continued limited competition in the industry in which Cycliq operates.

7.7 Funding

The funding for the Company for the two years following re-admission to the Official List of ASX will be met by the offer of Shares pursuant to the Public Offer under this Prospectus, the Company's existing cash reserves and sales of products and services (see Section 7.8 for further details). As and when further funds are required, either for existing or future developments, the Company will consider both raising additional capital from the issue of securities and/or from debt funding.

Notes

The Company and Cycliq will incur costs and receive revenues within the ordinary course of their respective businesses after 30 June 2016 which will change this amount prior to Settlement.
- Under the Minimum Subscription scenario above, it is assumed that 125,000,000 Shares are issued at an issue price of \$0.02 each to raise \$2,500,000. Under the Maximum Subscription scenario above, it is assumed that 250,000,000 Shares are issued at an issue price of \$0.02 each to raise \$5,000,000.

- Sales and marketing includes all costs related to advertising and promoting Cycliq's product. Business development & sales includes all business development and outbound evangelism costs. These costs will include trade shows, corporate events, non-marketing sponsorships the cost of business development staff, developing more in-store displays and merchandising them in core geographies, create a marketing campaign to build the brand and grow sales and expansion of the team to ensure product innovation and selling functions are supported across the main selling geographies and necessary human resources needed to fulfil the obligations of a listed entity.
- Working capital and corporate administration costs include the general costs associated with the management and operation of the business including managing and maintaining effective inventory across jurisdictions, administration expenses, management salaries, directors' fees, rent and other associated costs.
- Refer to Section 15.12 for the itemised costs of the expenses associated with the Acquisition and the Offers.

In the event Cycliq raises more than the Minimum Subscription amount of \$2,500,000, the additional funds raised will be first applied towards expenses associated with the Offers and Acquisition and then approximately as follows:

- (a) Expenses of the Offer;
- (b) Project development, engineering, sales and marketing and business development; and
- (c) Working capital.

The above table is a statement of current intentions as of the date of lodgement of this Prospectus with the ASIC. As with any budget, intervening events (including the risk factors outlined in Section 8) and new circumstances have the potential to affect the ultimate way funds will be applied. The Board reserves the right to alter the way funds are applied on this basis.

On completion of the minimum raising of \$2,500,000 under the Public Offer, the Board believes the Company will have sufficient working capital to achieve the objectives set out in this Prospectus (and in particular, Section 7.8).

Accordingly, the Company does not expect to declare any dividends during this period or in the short to medium term.

8. RISK FACTORS

8.1 Introduction

An investment in the Company is not risk free and the Board strongly recommends that potential investors consider the key risk factors detailed in the Investment Overview in Section 5 of this Prospectus as well as the risk factors described below, together with information contained elsewhere in this Prospectus before deciding whether to apply for Securities and to consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.

This Section identifies circumstances that the Board regards as the major risks associated with an investment in the Company and which may have a material adverse impact on the financial performance of the Company and the market price of the Shares if they were to arise.

There are risks associated with the contemplated Acquisition, specifically in relation to the success of the Company which may adversely impact the value of an investment in the Securities of the Company (Sections 8.2 and 8.3).

In addition, there are other general investment risks, many of which are largely beyond the control of the Company and its Directors (Section 8.4).

The Incoming Directors aim, and will aim, to manage these risks by carefully planning the Company's activities and implementing risk control measures. However, some of the risks identified below are highly unpredictable and the Company is limited to the extent to which they can effectively manage them.

The following risk factors are not intended to be an exhaustive list of the risk factors to which the Company is exposed. In addition, this Section has been prepared without taking into account offerees' individual financial objectives, financial situation and particular needs. Offerees should seek professional investment advice if they have any queries in relation to making an investment in the Company.

8.2 Specific Risks Associated with the Change in Nature and Scale of Activities

(a) Re-quotation of Shares on ASX

The acquisition of Cycliq constitutes a significant change in the nature and scale of the Company's activities and the Company needs to re-comply with Chapters 1 and 2 of the ASX Listing Rules as if it were seeking admission to the official list of ASX.

There is a risk that the Company may not be able to meet the requirements of the ASX for re-quotation of its Shares on the ASX. Should this occur, the Shares will not be able to be traded on the ASX until such time as those requirements can be met, if at all. Shareholders may be prevented from trading their Shares should the Company be suspended until such time as it does re-comply with the ASX Listing Rules.

(b) Dilution risk

The Company currently has 37,933,730 Shares on issue. At Settlement, the Company proposes to issue:

- (i) the Consideration Shares;

- (ii) the Performance Shares;
- (iii) the Public Capital Raising Shares; and
- (iv) the Noteholder Shares.

On issue of the Consideration Shares and the Initial Capital Raising Shares (including a full subscription under the Public Capital Raisings and provided no Options or Performance Shares are exercised):

- (i) the existing Shareholders will retain approximately 5.72% of the Company's issued Share capital;
- (ii) the Cycliq Shareholders will hold approximately 56.57% of the Company's issued Share capital; and
- (iii) the investors under the Public Capital Raising will hold approximately 37.71% of the Company's issued Share capital.

If subsequently the performance milestones are met and the Performance Shares are converted into the maximum number of Shares, being 200,000,000 Shares and provided no other Shares are issued or Options exercised), the interests of the existing Shareholders in the Company will reduce to 4.40%.

There is also a risk that the interests of Shareholders will be further diluted as a result of future capital raisings required in order to fund the development of the Cycliq business and the potential conversion of the Performance Options.

(c) **Liquidity risk**

On Settlement, the Company proposes to issue the Consideration Shares, the Performance Shares, the Public Capital Raising Shares and the Noteholder Shares. The Directors understand that ASX will treat some of these securities as restricted securities in accordance with Chapter 9 of the ASX Listing Rules. However, submissions may be made to the ASX to apply for cash formula relief in respect of these Securities.

Based on the post-Acquisition capital structure (assuming no further Shares are issued or Options exercised), the Noteholder and Consideration Shares will equate to approximately 56.57% of the issued Share capital on an undiluted basis. This could be considered an increased liquidity risk as a large portion of issued capital may not be able to be traded freely for a period of time.

(d) **Contractual risk**

Completion of the Acquisition is subject to the fulfilment of certain conditions precedent. The ability of the Company to achieve its stated objectives will depend on the performance by the parties of their obligations under the HOA. If any party defaults in the performance of their obligations, it may be necessary for the Company to approach a court to seek a legal remedy, which can be costly.

8.3 Risks in respect of Cycliq's current operations

(a) Competition and new technologies

The industry in which Cycliq is involved is subject to increasing domestic and global competition which is fast-paced and fast-changing. While the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, whose activities or actions may positively or negatively affect the operating and financial performance of the Company's projects and business. For instance, new technologies could result in the Cycliq not being differentiated to other similar offerings.

The size and financial strength of some of Cycliq's competitors may make it difficult for it to maintain a competitive position in the technology market. In particular, Cycliq's ability to acquire additional technology interests could be adversely affected if it is unable to respond effectively and/or in a timely manner to the strategies and actions of competitors and potential competitors or the entry of new competitors into the market. This may in turn impede the financial condition and rate of growth of the Company.

The key competition risk is in achieving appreciable market share and differentiation from its key competitors.

(b) Sales and marketing success

Following Settlement, the Company intends to focus on developing and marketing the Cycliq Technology. By its nature, there is no guarantee that the Cycliq Technology's development and marketing campaign will be successful. In the event that it is not, the Company may encounter difficulty creating market awareness of the Cycliq Technology. This would likely have an adverse impact on the Company's potential profitability.

Even if the Company does successfully commercialise the Cycliq Technology, there is a risk the Company will not achieve a commercial return. For example, new technology may overtake and supersede the Cycliq Technology.

(c) Attracting customers to the Cycliq Technology

The Company's revenue will be affected by its ability to attract customers to the Cycliq Technology, notably the HD camera/light combination bike accessory. Various factors can affect the level of customers using the Cycliq Technology, including:

- (i) Marketing and promotions: If the Company's marketing and promotion efforts are not effective this may result in fewer customers using the Cycliq Technology; and
- (ii) Brand damage: If the Company or Cycliq suffer from reputational damage, customer numbers could be affected.
- (iii) Pricing: Targeted customers may not be prepared to incur the costs to purchase the Cycliq Technology or to abandon the equivalent products that they currently use.

Accordingly, there is no guarantee that Cycliq's marketing and pricing strategies will be successful to achieve a sizeable take up rate of its products from customers.

Further, if market analysts publish negative or inaccurate information about Cycliq, it could lead to the Share price decreasing or restrict the volume of stock traded in the future.

(d) **Limited operating history**

Cycliq has a limited operating history and the potential of its business model is unproven. No assurances can be given that Cycliq will achieve commercial viability through the successful implementation of its business plans.

(e) **Historical financial performance is not indicative on future growth**

Cycliq's historical financial performance does not provide an indication on growth in the future. If future revenues are lower than expected and costs are higher than expected, financial results could show a lower amount of profit or greater losses.

Cycliq is a growing and early stage company which historically has spent more money than it has made, delivering losses. These losses can continue for a number of years while establishing the brand and product positioning which requires substantial cash. The amount of cash required to establish the brand or to generate enough revenue to bring Cycliq into a profitable financial position could require more cash than it has available. To continue to grow the brand, Cycliq could require additional funding which could include raising more money on the ASX, borrowing money from financial institutions or investors. Raising more capital is not guaranteed and without the additional capital required could lead to lower revenues than expected.

(f) **Failure to deal with growth**

Cycliq's business has the potential to grow rapidly. If that occurs and Cycliq fails to properly manage that growth, then that failure could harm its business. Any failure to properly meet customer demand could adversely affect the Cycliq business, including demand for Cycliq's products/services, revenue collection, customer satisfaction and public perception.

(g) **Risks associated with overseas expansion**

The Cycliq Technology has been constructed so as to be capable of being utilised in, and marketed to, multiple overseas jurisdictions. Cycliq generates much of its income from its international distribution network. As Cycliq seeks to expand into further overseas markets, including Southeast Asia, Europe and Latin America, it may require a physical presence in those countries and an associated increase in overheads, development costs and marketing costs.

There is the risk that any overseas expansion will be unsuccessful, or that even if there is demand for Cycliq's products in that market, that the costs of doing business in that market including the costs of establishing a new base in country, overseas regulatory compliance and the potential duplication of overheads and operating costs for the business, are such

that Cycliq's profitability and available working capital will be adversely impacted.

(h) **Customer concentration risk**

Over-reliance upon key customers may, in the event of termination or non-renewal of such arrangements, create revenue volatility. Cycliq is conscious of customer concentration risk and the need to diversify its customer base. However, large contract wins could skew the concentration of revenues, increasing the risk that non-renewal will have a larger impact on future earnings.

Distributors account for a significant amount of revenue for Cycliq. If these distributors were to order less or experience their own difficulties it could have a negative effect on Cycliq's business operations.

(i) **Staff risk**

There is a risk that, where there is a turnover of development staff who have knowledge of the technology and business, that knowledge will be lost in the event that those staff resign or retire. This involves the risk that those staff will have information in respect of Cycliq's intellectual property which has a commercial value to Cycliq as well as an opportunity cost for replacement of those staff and subsequent training.

This risk is mitigated as Cycliq has historically had low levels of staff turnover in the development teams. In addition, all staff contracts contain express provisions with respect to ownership of intellectual property and restraints of trade to limit any potential loss suffered by Cycliq to the maximum extent possible.

(j) **Protection of intellectual property rights**

Cycliq has pursued intellectual property rights protection in the form of trade marks, trade mark applications, patents and patent applications as set out in Annexure 1. Cycliq anticipates that its applications will be granted but the applications do not give Cycliq any currently enforceable rights.

The patents and trade marks (including any subsequently granted pursuant to the applications set out in Annexure 1) are only enforceable in the territories in which they are registered. Cycliq may have to consider applying for patent and trade mark registration in further territories as its operations and product range expands in order to protect its intellectual property rights in those areas but there is no guarantee that any such applications would be successful.

Legal standards relating to the validity, enforceability and scope of protection of intellectual property rights vary across jurisdictions. Effective patent, trademark, copyright and trade secret protection may not be available to the Company in every country in which the Cycliq Technology may eventually be launched. Accordingly, despite its efforts, the Company may not be able to prevent third parties from copying, infringing upon or misappropriating its intellectual property.

Market conditions depending, the Company may be required to incur significant expenses in maintaining, monitoring and protecting its intellectual property rights, for itself and/or any future

licensees/distributors. It may initiate or otherwise be involved in litigation against third parties for infringement, or to establish the validity, of its rights. Any litigation, whether or not it is successful, could result in significant expense to the Company and cause a distraction to management.

(k) **Failure to licence technology or intellectual property**

Cycliq is developing intellectual property which if patented, could be licensed for the use of third parties which could pay for the use of that intellectual property. If the intellectual property is not patented or if no third party is found to want the intellectual property, it would lead to a lower than anticipated revenue which would have a negative impact on the future financial status of the Company.

(l) **Failure to collect or sell sourced data (Big Data)**

Cycliq hopes to collect data from its customers which could be re-purposed and licensed to third parties (**Big Data**). Revenue from this source might not eventuate if Cycliq is unable to secure this data or find a third party to purchase this data. If either or both of these outcomes occurs, anticipated revenues will be less than anticipated having a negative impact on future cash flows for the Company.

(m) **Premium smartphone application risk**

Cycliq has not made a premium smartphone application in the past. Cycliq customers might not purchase such applications made by Cycliq which could lead to less than anticipated revenue realisation and could have a negative effect on the financial outcomes for the Company.

(n) **Currency risk**

Cycliq expects to derive a majority of its revenue from the United States, in US dollars. Accordingly, changes in the exchange rate between the United States dollar and the Australian dollar would be expected to have a direct effect on the performance of Cycliq.

(o) **Manufacturer and supplier risk**

Cycliq does not have internal manufacturing capabilities and relies on contractors to manufacture the products. Cycliq current relies on a single head-contractor in Hong Kong, which manages the manufacture through various sub-contractors in mainland China.

Any termination or significant damage to the arrangements with Cycliq's manufacturing head contractor could affect Cycliq's ability to manufacture its products and meet customer demand until a replacement contractor can be engaged.

Operational difficulties may arise with manufacturers, including reductions in the availability of production capacity, errors in complying with product specifications, insufficient quality control, failures to meet production deadlines, increases in manufacturing costs and increased lead times. Industrial action or workforce issues with contract manufacturers may lead to delays in the production of the products. The price of components for Cycliq products could also increase reducing the margin per product. If there are delays in product development due

to contracted manufacturers or suppliers, it could mean a delay in the release of products which could have a negative effect on revenues.

The engagement of a second manufacturing contractor may assist Cycliq in managing and reducing some of these risks.

Whilst Cycliq does not control contracted manufacturers or suppliers, Cycliq requires contracted manufacturers and suppliers to comply with their formal supplier code of conduct and relevant standards and have ongoing audit programs in place to assess compliance with such requirements.

(p) **Inventory risk**

To ensure there is an appropriate amount of inventory for each of the product lines, Cycliq forecast the anticipated demand for each product in advance of demand. This means placing orders with suppliers well in advance of requiring the products. If inventory management is not managed correctly, it could lead to an inability to continue working with channel partners leading to lower levels of revenue. If demands levels are underestimated, it could require Cycliq to source increased production capacity which would incur greater than anticipated costs of components and production leading to lower business and operating results.

(q) **Product support and warranties**

Cycliq offers a limited warranty, depending on jurisdiction, on its products and provides a product support division that addresses any support issues and determines if products are faulty or if the issue can be resolved directly with the customer. Every time a new product is introduced it will expose Cycliq to liability under the warranty. In addition, as Cycliq's products are innovative and have not been made before and there is a risk that a product may be faulty or require a recall.

(r) **Information systems and systems risk**

Cycliq are increasingly dependent on information systems to operate its e-commerce website, process transactions, respond to customer enquiries, manage its supply chain and ship goods, maintain cost-efficient operations and provide accurate financial reporting. Failures or interruptions in any of its information systems could affect Cycliq's ability to conduct and manage its operations.

(s) **Logistics and shipping**

Cycliq relies on ensuring the efficient and timely delivery of goods to customers. Third party providers are relied upon for warehousing, storage, delivery, tracking, record keeping operations and systems. If any of these systems or operations were to be disrupted it would affect our ability to maintain business operations. Currently, only a few providers of these services are used and if one were to stop operations it could cause significant delays to Cycliq's operations and the ability to deliver products to customers.

(t) **Environmental regulations**

Cycliq believes they are complying with all the current environmental requirements. However, environmental regulations change from time to time and this could affect business operations and the use of materials in the future.

(u) **Product development**

The growth of Cycliq largely depends on the ability to anticipate consumer demand and deliver solutions in a timely manner. The cost and effort involved in product development is substantial and may continue to be a growing cost centre for the Company. Developing new and innovative products involves many unknown factors such as requiring materials not yet available to design and engineering challenges that could require substantial additional resources. There may not be commercially appropriate uses for these products.

(v) **New products**

Developing related products and accessories to support the main Cycliq products could divert consumer interest and internal human resources away from the core range of Cycliq products. The market might not readily accept Cycliq delivering new product ranges with new features and this carries substantial financial risk. Adjusting the product mix by bringing out lower costs products could ultimately reducing general revenues if there is greater demand for the related products.

(w) **New markets**

Cycliq may look to expand its product offerings into new (vertical) markets. Any efforts to enter a new market space holds the risk that the product offering does not meet the needs of the market at an acceptable price point. New vertical markets usually cost substantially more to penetrate than a known market.

(x) **Growth of staff and ability to manage operations**

Cycliq anticipates the number of its staff to grow substantially in the next 12 months. This growth may place a strain on office accommodation potentially requiring additional or upgraded premises which could cost more than expected and may have an adverse effect on business and operating expenses. If Cycliq continue to grow their human capital and find the demand for Cycliq products is not as anticipated or expenses are higher than anticipated, Cycliq may have to take action to manage outgoings. This could result in workforce reductions or office accommodation changes or other restructuring costs.

8.4 General Risks Relating to the Company

(a) **Reliance on key management**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and directors. There can be no assurance that there will be no detrimental impact on the performance of the Company or its growth potential if one or more of these employees cease their

employment and suitable replacements are not identified and engaged in a timely manner.

(b) **Risk of high volume of Share sales**

If Settlement occurs, the Company will have issued a significant number of new securities to various parties. Some of the Cycliq Shareholders and others that receive Shares as a result of the Acquisition or the Public Capital Raising may not intend to continue to hold those Shares and may wish to sell them on ASX (subject to any applicable escrow period). There is a risk that an increase in the amount of people wanting to sell Shares may adversely impact on the market price of the Company's Shares.

There can be no assurance that there will be, or continue to be, an active market for Shares or that the price of Shares will increase. As a result, Shareholders may, upon selling their Shares, receive a market price for their securities that is less than the price of Shares offered pursuant to the Public Capital Raising.

(c) **Trading price of Shares**

The Company's operating results, economic and financial prospects and other factors will affect the trading price of the Shares. In addition, the price of Shares is subject to varied and often unpredictable influences on the market for equities, including, but not limited to, general economic conditions including the performance of the Australian dollar on world markets, inflation rates, foreign exchange rates and interest rates, variations in the general market for listed stocks in general, changes to government policy, legislation or regulation, industrial disputes, general operational and business risks, reviews by market analysts, and hedging or arbitrage trading activity that may develop involving the Shares.

In particular, the share prices for many companies have been and may in the future be highly volatile, which in many cases may reflect a diverse range of non-company specific influences such as global hostilities and tensions relating to certain unstable regions of the world, acts of terrorism and the general state of the global economy. No assurances can be made that the Company's market performance will not be adversely affected by any such market fluctuations or factors.

(d) **Going concern risk**

In the notes to and forming part of the Historical Financial Information contained in Section 11 the Investigating Accountant noted the following in relation to the Company:

"(Voyager's) ability to continue as a going concern is dependent on the success of the Public Offer. The Directors believe that the entity will continue as a going concern. As a result, the financial information has been prepared on a going concern basis. However, should the Public Offer be unsuccessful, the entity may not be able to continue as a going concern."

In addition, in the Independent Limited Assurance Report the Investigating Accountant noted the following:

"Regency issued an unqualified audit opinion for the financial report for the year ended 30 June 2014. Bentleys issued

emphases of matters for the financial reports for the year ended 30 June 2015 and 30 June 2016 as a result of material uncertainty surrounding the ability of the entity to continue as a going concern.”

Notwithstanding the above, the Directors believe that upon the successful completion of the Offer, the Company will have sufficient funds to adequately meet the Company’s current commitments and short term working capital requirements. However, it is highly likely that further funding will be required to meet the medium to long term working capital costs of the Company. Please refer to Section 8.4(e) below for further details.

In the event that the Offer is not completed successfully there is significant uncertainty as to whether the Company can continue as a going concern, and which is likely to have a material adverse effect on the Company’s activities.

(e) **Additional requirements for capital**

The capital requirements of the Company depend on numerous factors. Depending on the ability of the Company to generate income from its operations, the Company may require further financing in addition to amounts raised under the Public Capital Raising. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations.

(f) **Litigation risks**

The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company’s operations, financial performance and financial position. Neither the Company nor Cycliq are currently engaged in any litigation.

(g) **Economic risks**

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company’s activities, as well as on its ability to fund those activities.

Further, share market conditions may affect the value of the Company’s securities regardless of the Company’s operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) interest rates and inflation rates;
- (iii) currency fluctuations;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and

(vi) terrorism or other hostilities.

(h) **Technology Sector Risks**

The technology sector is characterised by rapid change. New and disruptive technologies can place competitive pressures on existing companies and business models, and technology stocks may experience greater price volatility than securities in some slower changing market sectors.

The value of the Company's securities may be adversely affected by any general decline in the valuation of listed securities and/or adverse market sentiment towards the technology sector in particular, regardless of the Company's operating performance.

(i) **Force majeure**

The Company, now or in the future, may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, extreme weather conditions, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

(j) **Acquisitions**

As part of its business strategy, the Company may make acquisitions of, or significant investments in, companies, products, technologies and/or products that are complementary to the Company's business. Any such future transactions are accompanied by the risks commonly encountered in making acquisitions of companies, products and technologies, such as integrating cultures and systems of operation, relocation of operations, short term strain on working capital requirements, achieving the sales and margins anticipated and retaining key staff and customer and supplier relationships.

(k) **Investment Speculative**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above may, in the future, materially affect the financial performance of the Company and the value of the Company's securities.

11.6 Notes to and Forming Part of the Historical Financial Information

Note 1: Summary of significant accounting policies

(a) Basis of Accounting

The historical financial information has been prepared in accordance with the measurement and recognition (but not the disclosure) requirements of Australian Accounting Standards, Australian Accounting Interpretations and the Corporations Act.

The financial statements have been prepared on an accruals basis, are based on historical cost and except where stated do not take into account changing money values or current valuations of selected non-current assets, financial assets and financial liabilities. Cost is based on the fair values of the consideration given in exchange for assets.

The preparation of the Statement of Financial Position requires the use of certain critical accounting estimates and assumptions. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the Statement of Financial Position are disclosed where appropriate.

The pro forma Statement of Financial Position as at 30 June 2016 represents the reviewed financial position and adjusted for the transactions discussed in Note 2 to this report. The Statement of Financial Position should be read in conjunction with the notes set out in this report.

(b) Going Concern

The financial information has been prepared on a going concern basis, which contemplates the continuity of normal business activity and the realization of assets and the settlement of liabilities in the normal course of business.

The entity's ability to continue as a going concern is dependent on the success of the Public Offer. The Directors believe that the entity will continue as a going concern. As a result, the financial information has been prepared on a going concern basis. However, should the Public Offer be unsuccessful, the entity may not be able to continue as a going concern. No adjustments have been made relating to the recoverability and classification of liabilities that might be necessary should the entity not continue as a going concern.

(c) Cash and Cash Equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts.

(d) **Receivables**

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any provision for impairment. Trade receivables are generally due for settlement within 30 days.

Collectability of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectable are written off by reducing the carrying amount directly. A provision for impairment of trade receivables is raised when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments (more than 60 days overdue) are considered indicators that the trade receivable may be impaired. The amount of the impairment allowance is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. Cash flows relating to short-term receivables are not discounted if the effect of discounting is immaterial.

Other receivables are recognised at amortised cost, less any provision for impairment.

(e) **Inventories**

Inventories are measured at the lower of cost and net realisable value. The cost of manufactured products includes direct materials, direct labour and an appropriate portion of variable and fixed overheads. Costs are assigned on the basis of weighted average costs.

(f) **Property, Plant and Equipment**

Plant and equipment is stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation is calculated on a straight-line basis to write off the net cost of each item of plant and equipment (excluding land) over their expected useful lives as follows:

Plant and equipment: 3-7 years

Motor Vehicle: 8 Years

The residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date.

An item of plant and equipment is derecognised upon disposal or when there is no future economic benefit to the Company. Gains and losses between the carrying amount and the disposal proceeds are taken to profit or loss. Any revaluation surplus reserve relating to the item disposed of is transferred directly to retained profits.

(g) **Income Tax**

The income tax expense (revenue) for the period comprises current income tax expense (income) and deferred tax expense (income).

Current income tax expense charged to the profit or loss is the tax payable on taxable income calculated using applicable income tax rates enacted, or substantially enacted, as at reporting date. Current tax liabilities (assets) are therefore measured at the amounts expected to be paid to (recovered from) the relevant taxation authority.

Deferred income tax expense reflects movements in deferred tax asset and deferred tax liability balances during the period as well unused tax losses.

Current and deferred income tax expense (income) is charged or credited directly to equity instead of the profit or loss when the tax relates to items that are credited or charged directly to equity.

Deferred tax assets and liabilities are ascertained based on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets also result where amounts have been fully expensed but future tax deductions are available. No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on accounting or taxable profit or loss.

Deferred tax assets relating to temporary differences and unused tax losses are recognised only to the extent that it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised.

Deferred tax assets and liabilities are calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates enacted or substantively enacted at reporting date. Their measurement also reflects the manner in which management expects to recover or settle the carrying amount of the related asset or liability.

Where temporary differences exist in relation to investments in subsidiaries, branches, associates, and joint ventures, deferred tax assets and liabilities are not recognised where the timing of the reversal of the temporary difference can be controlled and it is not probable that the reversal will occur in the foreseeable future.

Current tax assets and liabilities are offset where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur. Deferred tax assets and liabilities are offset where a legally enforceable right of set off exists, the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

(h) **Goods and services tax**

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

(i) **Impairment of Assets**

At each reporting date, the Company reviews the carrying values of its tangible and intangible assets to determine whether there is any indication that those assets have been impaired. If such an indication exists, the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, is compared to the asset's carrying value. Any excess of the asset's carrying value over its recoverable amount is expensed to the Statement of Profit or Loss and Other Comprehensive Income.

Impairment testing is performed annually for goodwill and intangible assets with indefinite lives.

Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

(j) **Payables**

Liabilities for trade creditors and other amounts are carried at amortised cost which is the fair value of the consideration to be paid in the future for goods and services received, whether or not billed to the entity. The amounts are unsecured and are usually paid within 30 days.

(k) **Borrowings**

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any differences between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent that there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment

for liquidity services and amortised over the period of the facility to which it relates.

(l) **Employee Benefits**

Wages and salaries, annual leave and sick leave

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave expected to be settled within 12 months of the reporting date are recognised in current liabilities in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled. Non-accumulating sick leave is expensed to profit or loss when incurred.

Share-based payments

Equity-settled and cash-settled share-based compensation benefits are provided to employees.

Equity-settled transactions are awards of shares, or options over shares that are provided to employees in exchange for the rendering of services. Cash-settled transactions are awards of cash for the exchange of services, where the amount of cash is determined by reference to the share price.

The cost of equity-settled transactions are measured at fair value on grant date. Fair value is determined using either the Binomial or Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option, together with non-vesting conditions that do not determine whether the Company receives the services that entitle the employees to receive payment. No account is taken of any other vesting conditions.

The cost of equity-settled transactions are recognised as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognised in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognised in previous periods.

The cost of cash-settled transactions is initially, and at each reporting date until vested, determined by applying either the Binomial or Black-Scholes option pricing model, taking into consideration the terms and conditions on which the award was granted. The cumulative charge to profit or loss until settlement of the liability is calculated as follows:

- (i) during the vesting period, the liability at each reporting date is the fair value of the award at that date multiplied by the expired portion of the vesting period.
- (ii) from the end of the vesting period until settlement of the award, the liability is the full fair value of the liability at the reporting date.

All changes in the liability are recognised in profit or loss. The ultimate cost of cash-settled transactions is the cash paid to settle the liability.

Market conditions are taken into consideration in determining fair value. Therefore any awards subject to market conditions are considered to vest irrespective of whether or not that market condition has been met, provided all other conditions are satisfied.

If equity-settled awards are modified, as a minimum an expense is recognised as if the modification has not been made. An additional expense is recognised, over the remaining vesting period, for any modification that increases the total fair value of the share-based compensation benefit as at the date of modification.

If the non-vesting condition is within the control of the Company or employee, the failure to satisfy the condition is treated as a cancellation. If the condition is not within the control of the Company or employee and is not satisfied during the vesting period, any remaining expense for the award is recognised over the remaining vesting period, unless the award is forfeited.

If equity-settled awards are cancelled, it is treated as if it has vested on the date of cancellation, and any remaining expense is recognised immediately. If a new replacement award is substituted for the cancelled award, the cancelled and new award is treated as if they were a modification.

(m) **Issued Capital**

Ordinary shares are classified as equity. Costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

(n) **Acquisition of Subsidiaries and Businesses**

Acquisitions of subsidiaries and businesses are accounted for using the acquisition method. The consideration for each acquisition is measured at the aggregate of the fair values (at the date of exchange) of assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognised in profit or loss as incurred.

Where applicable, the consideration for the acquisition includes any asset or liability resulting from a contingent consideration arrangement, measured at its acquisition-date fair value. Subsequent changes in such fair values are adjusted against the cost of acquisition where they qualify as measurement period adjustments (see below). All other subsequent changes in the fair value of contingent consideration classified as an asset or liability are accounted for in accordance with relevant Standards. Changes in the fair value of contingent consideration classified as equity are not recognised.

The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under AASB 3 are recognised at their fair value at the acquisition date, except that:

- (i) deferred tax assets or liabilities and liabilities or assets related to employee benefit arrangements are recognised and measured in accordance with AASB 112 Income Taxes and AASB 119 Employee Benefits respectively;
- (ii) liabilities or equity instruments related to the replacement by the Group of an acquiree's share-based payment awards are measured in accordance with AASB 2 Share-based Payment; and
- (iii) assets (or disposal groups) that are classified as held for sale in accordance with AASB 5 Non-current Assets Held for Sale and Discontinued Operations are measured in accordance with that Standard.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see below), or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognised as of that date.

The measurement period is the period from the date of acquisition to the date the Group obtains complete information about facts and circumstances that existed as of the acquisition date – and is subject to a maximum of one year.

The acquisition of Cycliq has been reflected in the pro forma Statement of Financial Position as at 30 June 2016. In accounting for the acquisition, the Group has taken guidance from the principles of AASB 3 Business Combinations ("AASB 3") and determined that Cycliq would be deemed to be the acquirer for accounting purposes. Accordingly, the transaction is accounted for as a reverse asset acquisition. As a result, the pro forma consolidated Statement of Financial Position as at 30 June 2016 has been prepared as a continuation of the Cycliq's financial statements, with Cycliq (as the accounting acquirer) accounting for the acquisitions as from 30 June 2016 (for the purposes of the pro forma consolidated Statement of Financial Position). As the activities of the legal acquirer (Voyager Global Group Ltd) would not constitute a business based on the requirements of AASB 3, any excess of the deemed consideration over the fair value of the acquisitions, as calculated in accordance with the reverse acquisition accounting principles, cannot be taken to goodwill and has been expensed as part of the transaction.

(o) **Critical accounting estimates and critical judgements in applying accounting policies**

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting

judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Share-based payment transactions

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using either the Binomial or Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

Provision for impairment of receivables

The provision for impairment of receivables assessment requires a degree of estimation and judgement. The level of provision is assessed by taking into account the ageing of receivables, historical collection rates and specific knowledge of the individual debtors financial position.

Note 2: Actual and Proposed Transactions to Arrive at the Pro-Forma Financial Information

*Consideration of the acquisition

In accordance with reverse asset acquisition accounting principles the consideration is deemed to have been incurred by Cycliq in the form of equity instruments issued to Voyager shareholders. The acquisition date fair value of this consideration has been determined with reference to the fair value of the issued shares of Voyager immediately prior to the acquisition and has been determined to be \$758,675 based on 37,933,730 shares based on a value of \$0.02 per share, being the issue price under the Prospectus. As a result, transaction costs of \$507,803 have been determined being the difference between the consideration and the fair value of net assets of Voyager Global Group Ltd for the purposes of preparation of the pro forma financial information.

At the actual acquisition date the fair value will be required to be determined again, therefore the fair value and consideration could be materially different which will impact the excess deemed consideration on acquisition.

13. CORPORATE GOVERNANCE

13.1 ASX Corporate Governance Council Principles and Recommendations

The Company has adopted comprehensive systems of control and accountability as the basis for the administration of corporate governance. The Incoming Directors are committed to administering the policies and procedures with openness and integrity, pursuing the true spirit of corporate governance commensurate with the Company's needs.

To the extent applicable, commensurate with the Company's size and nature, the Company has adopted *The Corporate Governance Principles and Recommendations (3rd Edition)* as published by ASX Corporate Governance Council (**Recommendations**).

The Incoming Directors will seek, where appropriate, to provide accountability levels that meet or exceed the Recommendations, which are not prescriptions, but guidelines. The Company's main corporate governance policies and practices that will be adopted from completion of the Offers are outlined below.

13.2 Board of Directors

The Board is responsible for corporate governance of the Company. The Incoming Directors will develop strategies for the Company, review strategic objectives and monitor performance against those objectives. The goals of the corporate governance processes are to:

- (a) maintain and increase Shareholder value;
- (b) ensure a prudential and ethical basis for the Company's conduct and activities; and
- (c) ensure compliance with the Company's legal and regulatory objectives.

Consistent with these goals, the Incoming Directors will assume the following responsibilities:

- (a) developing initiatives for profit and asset growth;
- (b) reviewing the corporate, commercial and financial performance of the Company on a regular basis;
- (c) acting on behalf of, and being accountable to, the Shareholders; and
- (d) identifying business risks and implementing actions to manage those risks and corporate systems to assure quality.

The Company is committed to the circulation of relevant materials to Directors in a timely manner to facilitate Directors' participation in the Board discussions on a fully-informed basis.

In light of the Company's size and nature, the Incoming Directors consider that the proposed composition of the Board is a cost effective and practical method of directing and managing the Company. If the Company's activities develop in size, nature and scope, the size of the Board and the implementation of additional corporate governance policies and structures will be reviewed.

13.3 Composition of the Board

Election of Board members is substantially the province of the Shareholders in general meeting. However, subject thereto, the Company is committed to the following principles:

- (a) the Board is to comprise Directors with a blend of skills, experience and attributes appropriate for the Company and its business; and
- (b) the principal criterion for the appointment of new Directors is their ability to add value to the Company and its business.

Following Settlement, the Board will consist of 4 Directors. Additional Board and management resources may be considered as appropriate as the Cycliq Technology develops.

Where a casual vacancy arises during the year, the Incoming Directors will have procedures to select the most suitable candidate with the appropriate experience and expertise to ensure a balanced and effective Board. Any Director appointed during the year to fill a casual vacancy or as an addition to the Board, holds office until the next general meeting and is then eligible for re-election by the Shareholders.

Each Incoming Director has confirmed to the Company that he anticipates being available to perform his or her duties as a non-executive director or executive director without constraint from other commitments.

The Incoming Directors consider an independent Director to be a non-executive director who is free of any interest, position, association or relationship that might influence, or reasonably be perceived to influence, his or her capacity to bring an independent judgement to bear on issues before the Board and to act in the best interests of the Company and its security holders generally. The Incoming Directors will consider the materiality of any given relationship on a case-by-case basis and reviews the independence of each Director in light of interests disclosed to the Board from time to time.

The Company's Board Charter sets out guidelines of materiality for the purpose of determining independence of Directors in accordance with the Recommendations and has adopted a definition of independence that is based on that set out in the Recommendations.

The Incoming Directors will consider whether there are any factors or considerations which may mean that a Director's interest, position, association or relationship might influence, or reasonably be perceived to influence, the capacity of the Director to bring an independent judgement to bear on issues before the Board and to act in the best interests of the Company and its Shareholders generally.

13.4 Board Charter

The Board Charter sets out the responsibilities of the Board in greater detail. It provides that the Board should comprise Directors with the appropriate mix of skills, experience, expertise and diversity which are relevant to the Company's businesses and the Board's responsibilities. The Board Charter allows the Board to delegate powers and responsibilities to committees established by the Board. The Board retains ultimate accountability to Shareholders in discharging its duties.

13.5 Identification and Management of Risk

The Board will be responsible for overseeing the establishment of and approving risk management strategies, policies, procedures and systems of the Company. The Company's management is responsible for establishing the Company's risk management framework. The Company will regularly undertake reviews of its risk management procedures to ensure that it complies with its legal obligations, including assisting the Chief Executive Officer or Chief Financial Officer to provide required declarations.

13.6 Ethical Standards

The Incoming Directors are committed to the establishment and maintenance of appropriate ethical standards and pursuant to a Code of conduct which has been adopted as part of the Corporate Governance which the Incoming Directors will abide by. The Company will carry on business honestly and fairly, acting only in ways that reflect well on the Company and in compliance with all laws and regulations.

The responsibilities incorporated in the Code of Conduct include protection of the Company's business, using the Company's resources in an appropriate manner, protecting confidential information and avoiding conflicts of interest.

13.7 Independent Professional Advice

Subject to the Chairman's approval (not to be unreasonably withheld), the Directors, at the Company's expense, may obtain independent professional advice on issues arising in the course of their duties.

13.8 Remuneration Arrangements

The total maximum remuneration of Non-Executive Directors is initially set by the Constitution and subsequent variation is by ordinary resolution of Shareholders in general meeting in accordance with the Constitution, the Corporations Act and the ASX Listing Rules, as applicable. The determination of Non-Executive Directors' remuneration within that maximum will be made by the Board having regard to the inputs and value to the Company of the respective contributions by each Non-Executive Director. The current amount has been set an amount not to exceed \$300,000 per annum.

In addition, a Director may be paid fees or other amounts (i.e. subject to any necessary Shareholder approval, non-cash performance incentives such as Options) as the Directors determine where a Director performs special duties or otherwise performs services outside the scope of the ordinary duties of a Director.

Directors are also entitled to be paid reasonable travelling, hotel and other expenses incurred by them respectively in or about the performance of their duties as Directors.

The Board reviews and approves the remuneration policy to enable the Company to attract and retain executives and Directors who will create value for Shareholders having consideration to the amount considered to be commensurate for a company of its size and level of activity as well as the relevant Directors' time, commitment and responsibility. The Board is also responsible for reviewing any employee incentive and equity-based plans including the appropriateness of performance hurdles and total payments proposed.

13.9 Trading Policy

The Board has adopted a Securities Trading Policy that sets out the guidelines on the sale and purchase of securities in the Company by its key management personnel (i.e. Directors and, if applicable, any employees reporting directly to the Managing Director). The Securities Trading Policy explains the types of conduct in relation to dealings in Shares that are prohibited under the Corporations Act and to establish procedures in relation to such persons' dealing in the Shares.

Under the terms of the policy, buying or selling Shares is not permitted at any time by any person who possesses inside information in a manner contrary to the Corporations Act or where short-term or speculative trading is involved. The policy also generally provides that written notification to the Chairman (or in the case of the Chairman, the Board) must be satisfied prior to trading.

13.10 External Audit

The Company in general meetings is responsible for the appointment of the external auditors of the Company, and the Board from time to time will review the scope, performance and fees of those external auditors.

13.11 Audit Committee

The Company will not have a separate audit committee until such time as the Board is of a sufficient size and structure, and the Company's operations are of a sufficient magnitude for a separate committee to be of benefit to the Company. In the meantime, the full Board will carry out the duties that would ordinarily be assigned to that committee under the written terms of reference for that committee, including but not limited to, monitoring and reviewing any matters of significance affecting financial reporting and compliance, the integrity of the financial reporting of the Company, the Company's internal financial control system and risk management systems and the external audit function.

13.12 Diversity Policy

The Board has adopted a diversity policy which provides a framework for the Company to achieve, amongst other things, a diverse and skilled workforce, a workplace culture characterised by inclusive practices and behaviours for the benefit of all staff, improved employment and career development opportunities for women and a work environment that values and utilises the contributions of employees with diverse backgrounds, experiences and perspectives.

15. ADDITIONAL MATERIAL INFORMATION

15.1 Suspension and Re-Admission to ASX

As the Company is currently a mineral exploration company, the Acquisition, if successfully completed, will represent a significant change in the nature and scale of the Company's operations to a technology company.

ASX has advised that this change in the nature and scale of the Company's activities will require:

- (a) the approval of Shareholders; and
- (b) the Company to re-comply with the admission requirements set out in Chapters 1 and 2 of the ASX Listing Rules.

The Company's Shares are currently suspended from trading on the ASX and will not be reinstated to Official Quotation until the Company has re-complied with Chapters 1 and 2 of the ASX Listing Rules and is re-admitted by ASX to the Official List.

Some of the key requirements of Chapters 1 and 2 of the ASX Listing Rules are:

- (a) the Company must satisfy the shareholder spread requirements relating to the minimum number of Shareholders and the minimum value of the shareholdings of those Shareholders;
- (b) the Company must satisfy the "assets test" as set out in ASX Listing Rule 1.3; and
- (c) the issue price of Shares must be at least 20 cents and the exercise price of Options must be at least 20 cents unless ASX grants the Company a waiver, which it has done to allow the issue price of the Shares under the Public Offer to be \$0.02.

On 3 August 2016, ASX granted the Company a waiver from the requirement listed in (c) above, to enable the Company to issue securities for the purpose of satisfying ASX Listing Rule 2.1, Condition 2 at not less than \$0.02 per Share with all Options issued having an exercise price of not less than \$0.02 after the completion of the Acquisition. This waiver is subject to Shareholders approving the Company undertaking the Public Capital Raising at not less than \$0.02 and other conditions as set out in the Company's announcement of 5 August 2016.

It is expected that the conduct of the Public Offer pursuant to this Prospectus will enable the Company to satisfy the above requirements.

Applicants should be aware that ASX will not re-admit or admit any Shares to Official Quotation until the Company re-complies with Chapters 1 and 2 of the Listing Rules and is re-admitted by ASX to the Official List. In the event that the Company does not receive conditional approval for re-admission to the Official List, the Company will not proceed with the Offers and will repay all Application Monies received by it in connection with this Prospectus (without interest).

The liquidator may, with the authority of a special resolution of the Company, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other securities in respect of which there is any liability.

(e) **Shareholder Liability**

As the Shares under the Prospectus are fully paid shares, they are not subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

who is declared by the Board to be eligible to receive grants of Performance Options under the Plan (**Participants**).

(b) **Offer**

The Board may, from time to time, in its absolute discretion, make a written offer to any Participant (including a Participant who has previously received an offer) to apply for up to a specified number of Performance Options, upon the terms set out in the Plan and upon such additional terms and conditions as the Board determines.

(c) **Plan limit**

The Company must have reasonable grounds to believe, when making an offer, that the number of Shares to be received on exercise of Performance Options offered under an offer, when aggregated with the number of Shares issued or that may be issued as a result of offers made in reliance on the Class Order at any time during the previous 3 year period under an employee incentive scheme covered by the Class Order or an ASIC exempt arrangement of a similar kind to an employee incentive scheme, will not exceed 5% of the total number of Shares on issue at the date of the offer.

(d) **Issue price**

Unless the Performance Options are quoted on the ASX, Options issued under the Plan will be issued for no more than nominal cash consideration.

(e) **Vesting Conditions**

A Performance Option may not vest earlier than the date 6 months from their issue date, and may otherwise be made subject to vesting conditions as determined by the Board in its discretion and as specified in the offer for the Performance Option.

(f) **Vesting**

The Board may in its absolute discretion (except in respect of a Change of Control occurring where Vesting Conditions are deemed to be automatically waived) by written notice to a Participant, resolve to waive any of the Vesting Conditions applying to Performance Options due to

- (ii) a Change of Control occurring; or
- (iii) the Company passing a resolution for voluntary winding up, or an order is made for the compulsory winding up of the Company.

A Performance Option will lapse upon the earlier to occur of:

- (ii) a Vesting Condition in relation to the Performance Option is not satisfied by its due date, or becomes incapable of satisfaction,

unless the Board exercises its discretion to vest the Performance Option (eg due to death, total and permanent disability);

- (iii) in respect of unvested Performance Option only, a Participant ceases to be a Participant, unless the Board exercises its discretion to vest the Right (eg due to death, total and permanent disability) or allow the unvested Performance Options to remain unvested after the relevant person ceases to be a Participant;
- (iv) in respect of vested Performance Options only, a relevant person ceases to be a Participant and the Performance Option granted in respect of that person is not exercised within one (1) month (or such later date as the Board determines) of the date that person ceases to be a Participant;
- (v) the Board deems that a Performance Option lapses due to fraud, dishonesty or other improper behaviour of the Participant;
- (vi) the Company undergoes a change in control or winding up, and the Board does not exercise its discretion to vest the Performance Option;
- (vii) the expiry date of the Performance Option; and
- (viii) the 3 year anniversary of the date of grant of the Performance Option.

(h) **Not transferrable**

Performance Options are only transferrable with the prior written consent of the Board (which may be withheld in its absolute discretion) or by force of law upon death to the participant's legal personal representative or upon bankruptcy to the participant's trustee in bankruptcy.

(i) **Shares**

Shares resulting from the exercise of the Performance Options shall, subject to any Sale Restrictions (refer below) from the date of issue, rank on equal terms with all other Shares on issue.

(j) **Quotation of Shares**

If Shares of the same class as those issued upon exercise of Performance Options issued under the Plan are quoted on the ASX, the Company will, subject to the ASX Listing Rules, apply to the ASX for those Shares to be quoted on ASX within 10 business days of the later of the date the Shares are issued and the date any restriction period applying to the disposal of Shares ends.

(k) **Share Sale Restrictions**

The Board may, in its discretion, determine at any time up until exercise of Performance Options, that a restriction period will apply to some or all of the Shares issued to a Participant (or their eligible nominee) on exercise of those Performance Options up to a maximum of seven (7) years from the grant date of the Performance Options.

(l) **No Participation Rights**

There are no participating rights or entitlements inherent in the Performance Options and holders will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the Performance Options.

(m) **Reorganisation**
