HD BIKE CAMERA + FRONT LIGHT

THE DASHCAM ENGINEERED FOR CYCLISTS

SAFER · SMARTER · SHARPER · SMALLER

CYCLIQ

Small - Sleek - Tough

The pocket-sized Fly12 CE weighs in at just 195g (5.5 oz) but don't let its size fool you. We've built it tough to withstand knocks, and the nanotechnology weather protection makes it suitable for use in all conditions.

WATERPROOF
TO 1 METRE

Safer - Smarter - Sharper - Smaller

Cycliq's new Fly12 CE integrated front-facing bike camera and safety light has been engineered to give cyclists super-sharp video recording, a more powerful light and impressive battery life. It's also smaller and lighter than ever, and packed with new features including a unique quick-release mount.

Super bright front light

The 600 lumen light cuts through the darkest night and is highly visible during the day. Choose from three light modes and three dimming options, or operate with camera only.

Full HD camera with audio

Shoot super-sharp video at up to 60 frames per second in 1920 x 1080p resolution with audio. The wide 135° viewing angle, 6-axis image stabilisation and video resolution option with High Dynamic Range (HDR) lets you capture action footage, number plates and incidents with amazing clarity.

Ride - Record - Edit - Share

The Fly12 connects via **ANT+** to your compatible Garmin bike computer to remotely control the camera and lights. The camera connects with the CycliqPlus mobile app through Bluetooth; and to Mac or PC with USB. The free CycliqPlus Desktop software lets you edit footage for social sharing and with Strava integration you overlay metrics – like heart rate and cadence – over the footage of your ride.

IN-BUILT
ALARM

Be safe - Be secure

Smart video looping means you'll never run out of storage space on your microSD card. And if the Fly12 CE detects you've been involved in an incident, it automatically locks and preserves the footage.

The in-built alarm alerts your smartphone, via the CyligPlus app, the moment your bike is moved. For extra security, the light flashes and the camera captures everything on video. When your battery runs low, we'll still get you home safely. The camera automatically turns off giving the light enough battery power for another 30 minutes.

Massive battery power

With up to 8 hours operating time, our industry-leading battery will last longer than your ride. A full recharge only takes 2.5 hours.

1/8TH TURN MOUNTING
ABOVE OR BELOW
HANDLEBARS

Easy come - Easy go

The new Fly12 CE can be mounted either above or below your handlebars, and the new quick-release system lets you attach or remove the Fly12 CE with a simple 1/8th of a turn. Our accessory range now includes multiple mounting solutions for all cyclists and includes the Cycliq Duo Mount which also holds your bike computer.

UP TO 8 HRS BATTERY LIFE
FULL RECHARGE IN 2.5 HRS

Actual Size

Better than ever

Designed for competitive cyclists, commuters, mountain bikers and those who simply ride for fun, the new mounting solutions mean the cameras fit onto more types of bike.

While Fly12 keeps its eyes and ears on the road, you can relax and enjoy the ride.
